Frontend Developer

Software developer with experience in mainly frontend development. Skilled in developing web apps, solving problems, and researching new technologies.

Specialties: JavaScript, React (with hooks), Redux, HTML5, CSS3, Git, ES6+
Technologies: Redux-Thunk, SASS, CSS Modules, Ant Design, Npm, Yarn, Axios, Formik, Yup,
Languages: English: C1, :
Programming resources used for self-learning: Official Documentations, Stack Overflow, Medium, self-projects
Achievements: I performed more than once in Baku's biggest stage
Interests: Professional guitarist, experienced guitar teacher

PROFESSIONAL EXPERIENCE

Privia Security, *Link*	**May 2021 - Present**

Frontend Developer
My work includes building the project's frontend part, connecting with the backend APIs, create dashboard charts based on backend data, convert design to code using technologies such as React.js (with the Hooks), JavaScript ES6, Redux/Thunk, HTML5, Sass, CSS Modules, Ant Design, Apex Charts

EDUCATION AND COURSES

Yönetim Bilişim Sistemleri (Bachelor's Degree), Akdeniz Üniversitesi	**2019 - Present**
Baku Turkish Anatolian High School	**2015-2019**
Engin Demiroğ Yazılım Geliştirici Yetiştirme Kampı (Bootcamp) (Java & React) *Link*	**May-July 2021**
Udemy, Basar Buyukkahraman Spring ve React ile Web Uygulaması Geliştirmek *Link*	**February - March 2021**

PROJECTS

Expense Tracker *(Code/Live)*	*2021*

Technologies: JavaScript, TypeScript, ReactJS, Redux/Thunk, Ant Design, Apex chart
Features: Expense Tracker built with ReactJs/TypeScript. You can login and register. It has authentication and authorization. Also, you can add a new expense category and new expense record. It has restful API integration for data and authentication and authorization. There is global state management with Redux.

Intern Management System	*2021*

Technologies: React.js (with the Hooks), JavaScript ES6, Redux/Thunk, HTML5, Sass, CSS Modules, Ant Design, Apex Charts, form validations, GIT

Features: I built this project from the ground-based. It is an Intern Management System for Privia Security. My work includes building the project's frontend part, connecting with the backend APIs, create dashboard charts based on backend data. You can add/edit/delete new interns or new projects, rate interns, assign a new project to an intern, etc. with this platform.

Human Resources Management System *(Code/Live)*	*2021*

Technologies: Java, Spring Boot, Postgresql

Features: N-Layer Architecture human resource management system project with Java.

Question-Answer Rest Api *(Code/Live)*	*2021*

Technologies: JavaScript, Node.js, ExpressJS, ES6+

Features: MVC Architecture question-answer rest api project with Node.js/Express.

Other projects on My GitHub Profile.
